

APOSTILA DE

# ANATOMIA CABEÇA E PESCOÇO

Prof.: Renata Georjutti

Ac.: Ana Caroline Azevedo Alves;  
Michelle Ramos Ferreira

# INTRODUÇÃO

Essa apostila de Anatomia da cabeça e pescoço foi criada com o intuito de ajudar os alunos de forma didática e criativa, de modo que todos os estudantes que terão contato com ela possam se divertir colorindo e memorizando as estruturas retratadas em cada página.

A ideia de criá-la foi da professora e gestora do curso de Odontologia Renata Georjutti juntamente com as acadêmicas Ana Caroline Azevedo Alves e Michelle Ramos Ferreira, as quais possuem uma página educacional no Instagram, nomeadas de @dentistaconselheira e @meumundooodonto, respectivamente, onde disponibilizam diariamente desenhos voltados para o aprendizado dos alunos.

Será um prazer ver vocês utilizando a apostila e postando os desenhos coloridos nas redes sociais. Quer aparecer na nossa página do Instagram? É só nos marcar nos desenhos. Façam um bom proveito, pois fizemos com muito carinho para vocês.

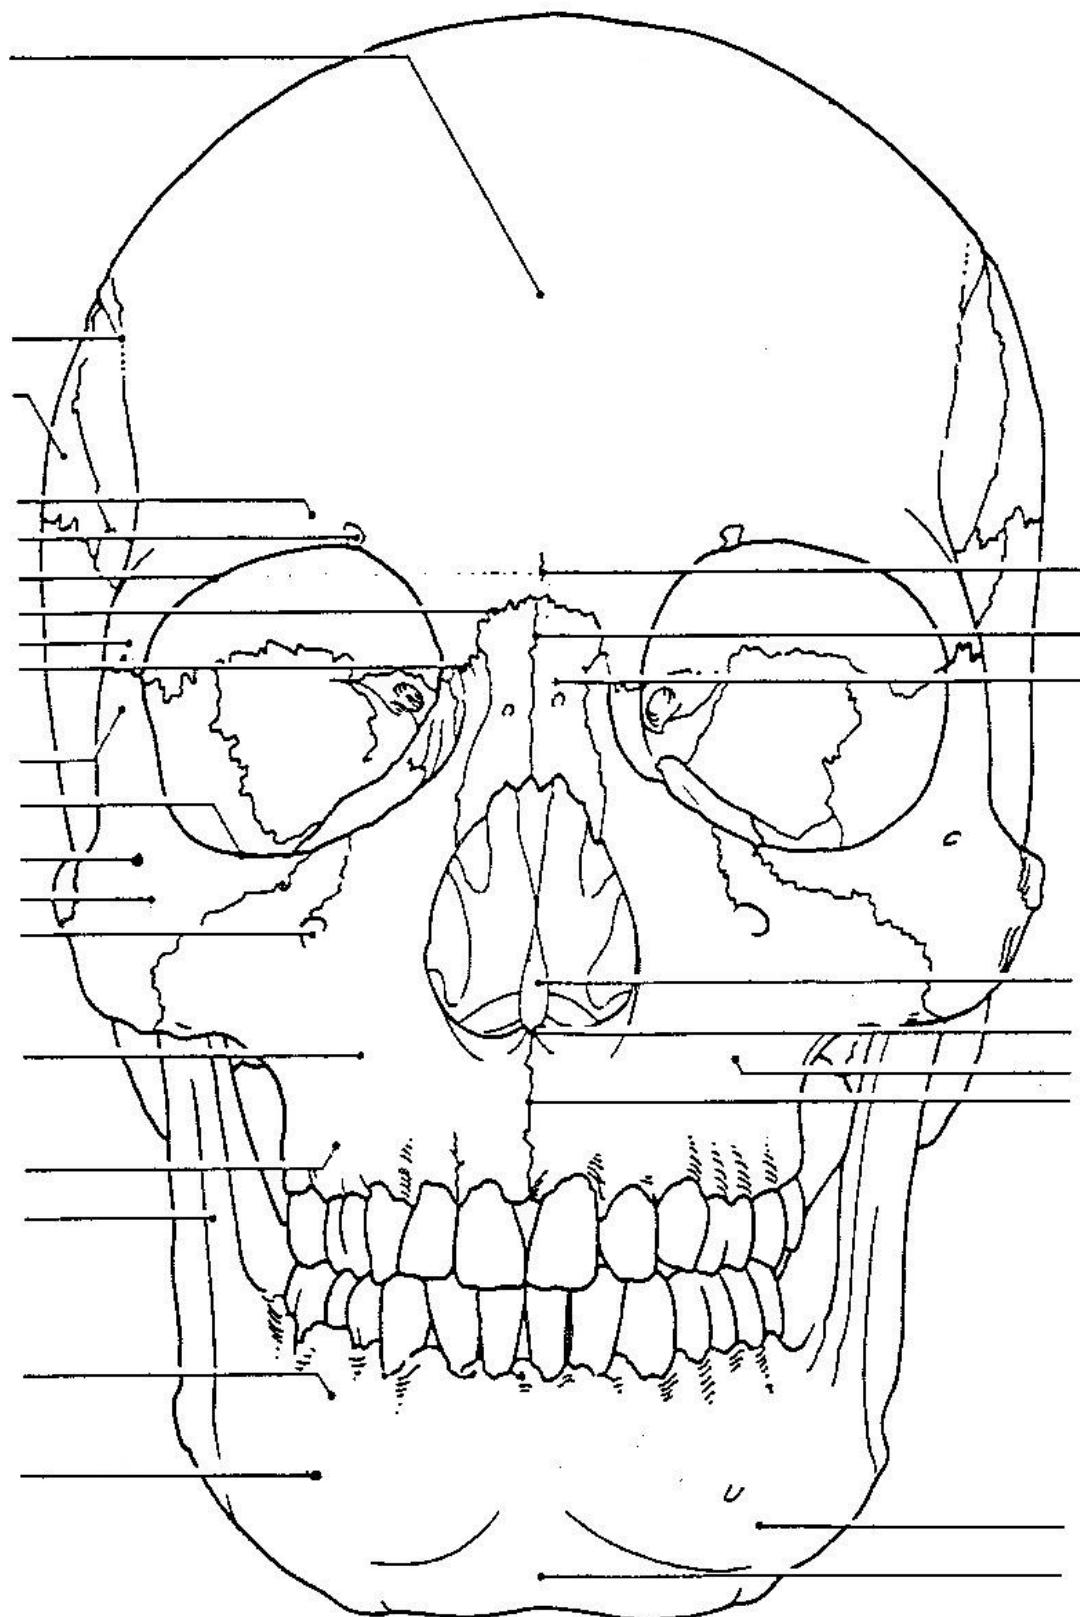

Beijinhos.
